CLINICAL COMMENTS & INTERPRETATION

• Elevated Fasting Glucose and HbA1c of 7.8% consistent with poorly controlled Diabetes Mellitus Type 2.
• Combined dyslipidemia noted with elevated Total Cholesterol (245 mg/dL), elevated Triglycerides, and elevated atherogenic LDL.
• Renal parameters (Creatinine 1.1 mg/dL, BUN 18 mg/dL) currently within preserved reference limits.
• Advised endocrinology consultation, dietary carbohydrate/fat restriction, and therapeutic lifestyle intervention.
